WINDOWS, DOORS & CONSERVATORIES

The classic style of a fully sculptured profile

SPECIFICATION GUIDE

When we set about adding a new beauty to the most respected profile system in the history of PVCu, we didn't take our job lightly.

We knew it had to be much more than just slim and shapely it had to help the fabricator stay lean and mean too, with a whole host of features and innovations to make manufacture an altogether smoother and more efficient business. Need we add that its sleek good looks will make it a winner with housebuilders and homeowners too.

Incorporating all the best features of PVCu, the Consort *fs* integrated system is a new generation 70mm lead-free profile, combining the best of style and performance. Proving that beauty can be more than just skin deep, this innovative profile, which has the highest attainable BSI Class 'A' specification, combines strength and value for money with a truly elegant sculptured appearance, following the lines of many timber designs.

Available in a full range of sizes, all with totally integrated system features, the Consort *fs* range will revolutionise the way you think about windows and doors.

elegant & **robust** *affordable*

The beauty of Consort *fs* goes far beyond its striking good looks; it also represents a completely new approach to what the specifier, fabricator, installer, housebuilder and end-user should expect from such an advanced system.

- Environmentally friendly lead-free 70mm profiles
- Internally glazed for extra security and ease of unit replacement
- BS 'Class A' specification profiles (highest attainable)
- Casement windows – Secured by Design. Police preferred initiative*
- Made to BSI specification
- New superb slimline french doors – *fs*
- New fire escape easy clean windows – *fs*
- Low sightline gaskets add to the frame's sleek appearance
- Available in a vast array of coloured foils and woodgrains, as well as all white
- Any painted colour in the RAL colour range available
- Achieves a U value of 1.4W/m2k when glazed with 28mm Low E sealed units with Warm Edge spacer bar argon filled cavity*
- Energy rated window as standard with glass from Consort

*Subject to specification.

COLOURED FRAMES – PAINTED

A whole new dimension has now been added to the already sleek and truly elegant appearance of the Consort *fs* integrated system… COLOUR!

Not just a single colour, but a vast range, from subtle greys and greens to deep blues, bright reds and even black and metallics. In fact, any colour within the RAL colour range.

At the cutting edge of paint technology, our brand new, environmentally friendly paint shop, staffed with fully trained personnel, is now able to bring you this latest innovation in PVCu.

The complete frame or door is sprayed using a unique coating system, specially formulated to chemically bond with the substrate to form a permanent coating of superior durability and retention of hue and gloss.

With a 10-year adhesion guarantee, this highly durable finish will not crack, flake or peel as it retains sufficient flexibility to move with the material to which it is applied. Thoroughly tested throughout Europe for over 10 years, this advanced colour system has proven resistance to all weather conditions, including salt water.

Virtually fade-free, even on browns and reds, this incredible coating is also UV stable, so you can bring colour back to your home with all the quality, low maintenance, style and benefits of Consort *fs*.

Fully Sculptured Profile

COLOURED FRAMES – FOILED

- Externally - a slightly textured, coloured foil giving the effect of painted wood
- Internally - clean white profile
- Available in a vast array of colours and woodgrains
- Also available in all white, oak and rosewood effect, which can be specified both internally and externally

Fully Sculptured Profile

INTERNALLY BEADED CASEMENTS

- Alternative outer frame sizes and transom/ mullion available
- An ideal window for all applications available in a full range of styles and sizes
- 70mm front to back multi-chambered profiles
- Available in a vast array of coloured foils and woodgrains as well as all white

Two windows with two handles

Position one: fire escape

Position two: easy clean

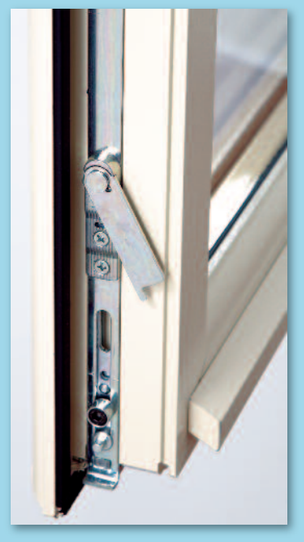
Fully Sculptured Profile

FIRE ESCAPE WINDOWS

- Two windows with two handles
- Slimline profile
- 70mm front to back multi-chambered profiles
- Locking mechanism – Master: Multilock locking Slave: top and bottom shoot bolts
- Sliding hinge mechanism for easy cleaning to both windows
- Available in a vast array of coloured foils and woodgrains as well as all white
- Full range of sizes available

Position one: fire escape

Position two: easy clean



Fully Sculptured Profile

TILT & TURN WINDOWS

- An ideal window for many different types of installation from high rise blocks to domestic houses
- Features include the ability to clean the outside glass from indoors and the ventilation benefits while in the tilt position
- Face fix or concealed gearing available
- Alternative sizes of outer frame and transom/mullion available
- 70mm front to back multi-chambered profiles
- Available in a vast array of coloured foils and woodgrains as well as all white

REVERSIBLE WINDOWS

- Sash rotates 360°
- Easy cleaning of all surfaces from the inside
- Two restricted opening positions for ventilation
- Smooth, easy operation
- Multipoint locking system
- Low maintenance
- Available in rosewood, oak and all white in standard lead time. Available in other foils with extended lead time

Fully Sculptured Profile

VERTICAL SLIDER WINDOWS

- High Security Three Chambered system (most have two)
- Ovolo design
- Rolled in gasket
- Triple seals
- 24mm Clearline glazing
- All the hardware picks up reinforcing
- Equal sightlines
- Coupling system
- Choice of hardware colour
- Decorative horns – if requested
- Low maintenance
- Easy cleaning
- Specially designed steel enabling window sizes up to 1500 x 2800mm to be manufactured
- Secured by Design – Police preferred specification*
- Available in rosewood, oak, cream and all white in standard lead time. Available in other foils with extended lead time

* Subject to specification.

70mm Double Rebated

COMPOSITE DOORS

- Door Leaf and frame manufactured in the UK to the highest quality under ISO9001
- Triple glazing as standard – for better heat retention and noise reduction
- Over 50% thicker than a standard composite door
- Galvanised steel reinforcement
- Improved thermal and acoustic insulation thanks to double compression seals
- Doors come fully framed and glazed, with hardware
- Available in a vast array of colours

MAGNUM INTERNAL FIRE DOORS

Fire doors are intrinsic to a building's fire and safety strategy, designed to protect people and property. They can provide an escape route in the event of an emergency and separate zones to help keep fire contained, buying valuable time for building occupants to evacuate.

Constructed with a solid fire retardant core, every door has been fire and smoke tested for up to and beyond 30 minutes and is proven to protect against cold smoke ingress (FD30s).

Monitored throughout its manufacture and fully approved by CERTIFIRE, each door has a fixed identification label detailing its unique reference number to ensure full traceability, providing both installers and homeowners with complete peace of mind.

Secured by Design

BI-FOLD DOORS

Blurring the lines between where the home ends and the garden begins, our range of bi-fold doors creates a versatile new living space that fills your home with a unique sense of light and space. In summer cast them wide open to let the fresh air in, and in winter seal them tight and cosy up in the warmth without losing your stunning view.

Bi-fold doors are a stunning alternative to french or patio doors and can be installed so that the doors sit inside or outside of the property when folded back. Engineered with such precision, they glide smoothly back and forth with only the lightest of touch. Secured when closed by our extremely advanced multi-locking system.

Of course, as well as being a beautiful way to bridge the gap between your home and garden, they can also be used to separate rooms within your home, creating a truly unique and adaptable space.

WARMCORE® FOLDING SLIDING DOORS

The flexibility of a WarmCore folding sliding door helps your home become a space that works for you. Open and airy on beautiful summer days, warm and insulating in the colder months. Integrating outside living with interiors whilst enhancing both.

Safe and secure, WarmCore aluminium doors are built around a full width orange thermal core to maximise the use of low conductive material. This ensures they are 25% more efficient at keeping heat in your home than traditional aluminium doors, with no compromise on strength or style.

Inwards or outwards opening up to 6 metres wide with as many as 7 opening sashes smoothly gliding along custom designed tracks. The innovative design allows you to split the door sashes in whichever way suits your home, including having a 'traffic' door at one end for everyday use. When open all sashes stack neatly in line with each other and are kept perfectly parallel using discreet magnets. Open ends of the door sashes, hidden from view when closed, are coloured black for a neat uniform appearance.

WarmCore – warm, stylish, wide span doors for the flexibility of modern living.

- Full-length 5 point locking system
- 3 opposed hook locks and twin shoot bolts
- Integral dog bolts to bind doors together when closed
- High strength hinges and rollers
- Secured by Design – police preferred specification when fitted with optional laminate glass upgrade
- Certified PAS 24 – enhanced security performance
- 4 external door sash designs
- 4 threshold options
- Available in 4 hard-wearing powder coat finishes, Pure White, Heritage Cream, Jet Black and Anthracite Grey
- Choice of different interior and exterior colour options
- 3 handle finishes – Matt Black, Brushed Graphite or Satin Silver
- Easy Clean glass technology available to reduce maintenance
- Optional triple glazing – 75% better thermal performance

CELSIUS SOLID ROOF CONSERVATORIES

We have added the Celsius Solid Roof to our extensive range enabling any homeowner to now have a true ‘year round’ room.
An innovative tiled roof system for new or replacement conservatory style extensions with superior thermal performance, Celsius creates a high quality living space that ensures warmth in winter, yet stays cool in summer.

This unique system has been designed using proven high quality components supplied by the leading companies in their fields. Custom-made to precisely meet requirements and delivered in complete kit form for a quick and easy installation, Celsius offers excellent value for money with reduced labour costs.

Fitting a Celsius Solid Roof will transform the visual impact of any existing traditional-styled glazed roof conservatory, whether Georgian, Victorian, Gable or lean-to. A seamless link between home and garden, ensuring the most is made of outdoor space, whatever the weather.

Fully Sculptured Profile

CONSERVATORIES

Manufactured from modern aluminium and PVCu, our virtually maintenance-free conservatories are individually designed to enhance and extend your home beautifully. No matter if your home is a period property or more contemporary, there is a conservatory to suit every type, seamlessly matching your home in terms of brickwork, colour, shape and style.

The Victorian conservatory is a timeless design, typically having a 3 or 5 panel faceted end, which gives it a unique look and charm. The Georgian or Edwardian conservatory with its flat front and rectangular/square shape, ensures no wasted space and floods the room with light due to its high roof style. Gable style conservatories have two sloped roof sections ending in a vertical gable end. Well suited to older properties making excellent use of the additional headroom and available internal floor space. Alternatively, the Lean-to or Sun Room is an ideal solution for properties with limited space. Usually rectangular, with clean, uncomplicated lines, and a sloping roof.

Whatever style you choose, you can be assured the conservatory roof has been exhaustively tested to the highest British Standards to be robust, durable and long lasting. You can choose from polycarbonate, which is a damage-resistant, lightweight insulating glazing material, providing resistance against the effects of UV weathering. Or, to give your conservatory that all important wow factor, choose from our range of Low E, self-cleaning or solar controlled glass which dramatically improve views from within your conservatory, and allow for more natural sunlight.

Fully Sculptured Profile

ORANGERIES

Transform your living space and aspire to the grandeur of something completely unique.

Historically, Orangeries were luxury out buildings or extensions used for growing oranges, exotic fruits and trees in winter. Today an Orangery provides a stunningly attractive and seamless extension to your home, that can be used as a kitchen extension, dining room, home office or extra living space for relaxation or entertainment.

The most traditional style of Orangery, and the most expensive, uses traditional materials such as brick or stone pillars between large windows to support the atrium style roof.

As an alternative, using modern design and cutting edge technology, it is now possible to create this unique styling using PVCu and aluminium. The exclusively designed and innovative Consort Load Bearing Corner Posts, make it possible to create a beautiful Orangery with a traditional brick base. With the atrium style roof and concealed lighting adding dramatic impact and a quality feel, an Orangery is the perfect option to bring light, warmth and an immense feeling of space to this and adjoining rooms.

All the benefits of a conservatory plus much, much more.

STRATUS THERMAL LANTERN ROOFS

The purpose designed Stratus aluminium lantern roof system is discreet yet stylish, coupling sleek contemporary looks with truly outstanding performance, allowing light to flood into your home's interior.

Designed from the ground up around an innovative thermally broken system, it provides excellent thermal performance, keeping you cool in the summer and warm in the winter, while delivering the architectural refinement you'd expect from a high end aluminium lantern system.

Whether you are building a new kitchen-diner extension or replacing an existing lantern roof, Stratus will help redefine your home, creating light and airy spaces for you to enjoy.
